Summary

- Third-year Information System student with hands-on experience building fullstack web applications. Passionate about clean code, scalable systems, and user-centered design. Looking to contribute to impactful software projects and continue growing as a developer in a collaborative environment.

Education

University of Information Technology (UIT), Bachelor of Information System

Technologies

Languages: TypeScript, JavaScript, Node.js

Database: MongoDB, MySQL

Framework: Express.js, React 19, React Router v7 (SSR), Mongoose, TanStack React Query, Shadcn/UI, Tailwind CSS

Others: Git, Vite, Cloudinary, Resend, Postman

Projects

Team Collaboration Platform

Fullstack Developer (Solo Project, 2025)

A full-featured web app for project management and collaboration, with role-based access and real-time email notifications.

- Built secure auth: JWT, email verification, password reset, bcrypt hashing
- Implemented workspaces with invite links and role-based permissions (Owner, Admin, Member, Viewer)
- Developed projects and tasks with CRUD, status tracking, comments, dependencies, activity logs
- Created dashboard: project stats, activity feeds, deadlines, Recharts-based data visualizations
- Integrated Resend API for dynamic emails: invites, task updates, password actions

Tech Stack: React 19, TypeScript, Node.js, Express.js, MongoDB, JWT, Tailwind CSS, Resend, Recharts

Live Demo: project-management-clowder.vercel.app
